

Network Architechts, LLC is a value-added solutions provider in Champlin and Northfield, Minnesota that promotes and provides EV charging solutions to businesses across the state. As professional system engineers, the Network Architechts staff has the resources needed to expedite products and services safely and efficiently, and works with a suite of technologies to optimize customers' performance.

Network Architechts provides technical consulting services for the Modas Systems EV charging system, a cost-effective turn-key solution for commercial deployments. The Modas system makes the process easy for customers by delivering project management, site surveys, permitting, and complete installation services, which include little or no upfront investments. The Modas system also provides future-proof charging solutions, including the use of pre-sold digital advertising to offer a passive income stream for Site Hosts. With the system, Site Hosts can promote their organization on the advertising board without an added cost.

Looking forward, the Network Architechts staff hopes to become a vendor of choice and a resource to the community.
